

## Barnacle-Off™

50831 Replacement Quick  
Change Cutters for unit

50810

Barnacle-Off™

Attaches to standard pneumatic or hydraulic powered tools.

1,000 to 2,000 RPM is suggested for underwater use.

Remove Zebra mussels and barnacles in half the time, used for underwater cleaning

Remove heavy buildup of mussels, barnacles or other encrustations from steel, concrete, pilings, seawalls, bulkheads and ships.

The Barnacle-Off™ is furnished with a one-piece stainless-steel housing and attached stainless knockers. The standard unit comes with plated hardened steel cutters. It is also available with a heavy-duty quick-change assembly. Unit comes with a 5/8" -11 thread center hole (14mm available) which attached to standard pneumatic or hydraulic powered tools. 1,00- to 2,000 RPM is suggested for underwater use.

The Barnacle-Off™ moves across the surface, the outside knocker bars shatter barnacles and other heavy growth. The rotating hardened steel cutters follow up with a chipping and scraping action which removes the remaining material, leaving a clean surface, water passing through the tool keeps the cutting wheels clean. The is ecologically safe since it adds no harmful chemicals to our environment.
