The **Multi SeaLite®** fills the void of high performance light at a reasonable price. The multitude of configurations makes this light truly multi-purpose. Options include three different reflectors, lamps in varying wattage and voltages, and four types of connectors.

Three different DeepSea-designed, user-interchangeable reflectors tailor the light's output from a spot to even, "hot spot"-free medium and wide angle flood beam patterns. An external lens retaining cowl protects the borosilicate glass dome and acts as a baffle to prevent stray light from entering the water column, thus minimizing backscatter. The **Multi SeaLite®** is 1,000 msw (3,280 fsw) rated and available in Aluminum, Stainless Steel, and Titanium housings. The aluminum version has a hard anodized body and an Ultern plastic cowl for increased corrosion resistance.
