Certified Hygrometer and Temperature Indicator

Shows Relative Humidity & Temperature in both Fahrenheit & Centigrade at a glance

The Certified Hygrometer, **HTAB-176**, is certified to be accurate within +/- 3% RH. The dial indicates the complete range of 0 to 100% relative humidity. Each instrument has been tested at three different positions of the dial at temperatures ranging from 32 to 230 F. The calibration and certification are done under ISO-9001 control. The bi-metallic thermometer on the model HTAB-176 is accurate to 1% of scale w/ a range of =20 to 100 C and 0 to 210 F. Graduations are 1 for Centigrade and 1% RH.

This is the only humidity indicator that we know of that has a 1 year guarantee and a 5-year warranty. Some of our humidity indicators are working on the same principle as this improved instrument has been in use for over 10 years and is giving satisfactory service day after day, month after month, and year after year. Both the humidity and temperature are directly read without any calculations whatsoever. Solid 6" overall brass case drilled for wall mounting.

Shipping weight: 3 lbs.
