

## Model O2100 Oxygen Percentage Monitor

Fixing centers: 50 mm x 108 mm

### Description

The model O2100 is a battery powered portable Oxygen monitor, used to display the Oxygen fraction in a gas sample.

**NATO Stock No. 08686630-99-545-4912**

### Principle of Operation

Oxygen is detected by an electro-chemical sensor, which produces a millivolt output proportional to Oxygen concentration. The sensor output is scaled and displayed in percent Oxygen.

### Features

- High resolution (0.1% O<sub>2</sub>) and accuracy 1% of FS
- Integral battery compensation (9v PP3)
- ON/OFF Switch
- Low battery indication
- Impact resistant case
- Zero warm-up time
- Non attitude sensitive
- Long life, fast response, temperature compensated, sensor
